

MINE EXPLOSION KILLS FIVE MEN AT JOHNSON CITY

Explosion Believed to Have Been Caused By Gas Pocket

(By The Associated Press)

JOHNSON CITY, Ill., Sept. 29.—Five men, three mine surveyors and two miners, were killed and three miners were injured slightly in an explosion in the Lake Creek mine, of the Consolidated Coal company, one and a half miles northeast of here, this afternoon.

The dead are:

Paul Best, surveyor, 25, married, Collinsville, Ill.

Lee Bailey, surveyor, 25, single, Collinsville, Ill.

Harry Shaw, 30, surveyor, married, two children, Collinsville, Ill.

Marcus Kalovitch, miner, 40, family of five, Johnson City, Ill.

Pete Castrola, miner, single, Johnson City, Ill.

The injured include James Gower, 35, and Ed Jenkins, 55, miners, who were slightly overcome by gas. The name of the third person injured could not be learned.

About 350 men were at work in the mine when the explosion occurred, and all but five were rescued. Seven miners, including the three injured, were imprisoned for a short time but were taken from the shaft by rescue teams hastily called.

The explosion is believed by mine officials to have taken place when the three surveyors, carrying oil-burning lamps on their caps, went into an unused entry in which a gas pocket had formed. The two miners were digging coal near this entry.

The detonating noise made by the explosion, which the officials said resulted when the gas pocket was ignited by the lamps, was heard throughout the mine, and all but 12 of the 350 men rushed to the shaft and ascended the mine mouth before any of the escaping gas could overtake them.

A rescue team was summoned immediately from Herrin, and with local volunteers descended the shaft and found seven men overcome by gas and the five bodies. The seven men had taken refuge in another entry and by doing this, prevented the gas from killing them. The bodies of the seven imprisoned men then were brought to the surface. State Mine Examiner Morgan directed the rescues and went into the shaft.

An official investigating to determine the cause of the explosion will be held tomorrow. The inquest also will be held tomorrow.

MYSTERY SURROUNDS CEDAR RAPIDS DEATH

(By The Associated Press)

CEDAR RAPIDS, Ia., Sept. 29.—Deep mystery was thrown around the death of Roy McDonald, who died in a hospital here Thursday night as the result of a bullet wound in the head, supposed at first, to have been self-inflicted. A coroner's jury, after hearing the testimony today, refused to state suicide was the cause of death.

McDonald took out \$14,000 in life insurance only a short time ago. He was shot while in the basement of his home and witnesses testified today that an outside cellar door was open when they ran to the cellar after hearing the shot.

PIKE COUNTY MAN GETS REQUEST FROM CALIFORNIA

Will E. Betts of Rockport, Ill., was recently notified of a bequest of \$2,500 from the estate of M. T. Mansfield of Oakland, Cal. Some years ago when Betts was working in a grading camp in Utah he received an injury which made the amputation of his hand necessary. At that time he formed the acquaintance of Mr. Mansfield, a man of wealth, who maintained his interest in him thru all the after years. Quite frequently Mr. Mansfield sent gifts of money to the Pike county man and the remembrance in his will gave further proof of his continued interest.

ATTACHMENT IS PLACED ON FUNDS OF HUGO STINNES

James A. Tillman, Promoter, Ties up Funds Amounting to \$2,055,185

(By The Associated Press)

NEW YORK, Sept. 29.—Attachment of funds carried in New York banks to the credit of Hugo Stinnes, German industrial magnate, in connection with a \$2,055,185 breach of contract suit filed by James A. Tillman, promoter, revealed today that Stinnes, thru various financial schemes, had made attempts to float loans for hundreds of millions of dollars in this country.

The attachment order, signed by Supreme Court Justice Wasservogel, was placed in effect by deputies to Sheriff Nagle, of New York county. The funds, the exact amount of which was not disclosed, are held by the National City Bank, the Guaranty Trust company, the Equitable Trust company and Hollen and company.

Tillman claimed that on May 3, 1919, he entered into an agreement with Stinnes which necessitated the transfer to a Swedish corporation controlled by Stinnes, of certain agencies for developing trade with the United States. These agencies were owned by Tillman, he stated, and he was to become, under the agreement, managing director of the principal office at Stockholm.

Stinnes' Tillman's statement continued, was to furnish collateral security that Tillman might undertake to secure a loan of \$125,000,000 in the United States. This amount was needed by Stinnes at the time, it was said, for the purchase of American materials.

Instead of furnishing this collateral, the statement continued, Stinnes concerted some "fanciful" financial schemes as a sort of guarantee for Germany's financial difficulties, which Tillman thought never would be seriously entertained by American bankers.

One scheme, Tillman averred, was that he was to obtain a \$100,000,000 loan upon Stinnes' promissory note, unsecured by any collateral. After this loan, the statement went on, Stinnes planned to use the money for the purchase in the United States of billions of marks at the current exchange rate of \$0.125. With these marks Stinnes intended to purchase mortgages held by the Hansa, a corporation functioning something after the fashion of American title and bond and mortgage companies.

After these mortgages were secured at their face or pre-war value in marks, Stinnes was to send them to the United States as collateral for a \$20,000,000,000 loan, based on pre-war values. Tillman averred Stinnes figures he would not be observed by American bankers in this manipulation.

Tillman said he told Stinnes he could have no hand in such schemes as he knew American bankers would not entertain them, but Stinnes refused to listen to him.

Tillman claimed the \$2,055,185, for which he sued, was due him on commissions in the few enterprises he undertook for Stinnes.

REFEREE GLEASON DECIDES IN FAVOR OF MRS. STILLMAN

Finds Stillman Guilty of Same Charge He Made Against Wife

(By The Associated Press)

CARMEI, N. Y., Sept. 29.—James A. Stillman, multi-millionaire banker of New York, today lost his fight to divorce Mrs. Anne U. Stillman and disown Baby Guy Stillman, and was found guilty of the charge he made against his wife—the parentage of an illegitimate child.

Mr. Stillman, it was indicated tonight, has not given up the fight. His lawyers would not say whether they would appeal from the finding of the referee should these be upset by a supreme court justice, but they were reported to have made a move which seemingly makes clear that they have not conceded defeat.

It was announced by John E. Mack, guardian ad litem for Guy Stillman, that at Poughkeepsie a week from tomorrow he would ask Justice Morschauser to confirm Referee Gleason's findings. As soon as this announcement was given out, it was learned that the plaintiff will seek to have the matter placed before Supreme Justice Tompkins instead of Justice Morschauser on the same date.

Most of the open court hearings in the case, have been before Justice Morschauser. It was he who granted Mrs. Stillman all the money of \$50,000 and it was Justice Morschauser who granted, over protest, the shifting of the trial to Montreal last Spring. There Mrs. Stillman presented some of her most damaging evidence.

The report of the case, filed here this morning by Daniel J. Gleason, the referee, gave to Mrs. Stillman a complete victory in her defense of her own honor and the good name of Guy, her three-year-old son. She was also victorious in the counter attack she waged against Mr. Stillman. The referee upheld her accusation that the banker had lived with a former Broadway show girl, Florence H. Leeds, in the manner of husband and wife, and that he had acknowledged himself the father of two children born to Mrs. Leeds.

Still Did Not Prove Charges. Mr. Gleason ruled that Mr. Stillman had not proved his allegations. He found that Mrs. Stillman had violated her marriage vows in her conduct with Frode Beauvais, half breed Indian guide, formerly employed by the Stillmans at their summer camp in Canada. He also found Guy Stillman to be the legitimate son of Mr. and Mrs. Stillman. The banker, in impugning the legitimacy of Little Guy, born in November, 1918, had charged that Beauvais was the baby's father.

As a result of today's victory, Gleason retains his right to share with his two older brothers and his sister in the \$6,000,000 trust fund established for them by their grandfather, the late James Stillman, and in a \$27,000,000 fund, to be divided when James A. Stillman dies.

Approximately Eighty Five Per Cent are Indicted in New York

(By The Associated Press)

Several of the indicted firms also manufacture bath tubs and similar accessories.

EVENTS OF NEXT FEW DAYS HINGE ON CONFERENCE

Await Outcome of Envoy's Meeting with Pasha

(By The Associated Press)

LONDON, Sept. 29.—The events of the next few days probably will be largely influenced by the outcome of the meeting which M. Franklin Bouillon, the French envoy sent by the Paris government to Asiatic Turkey, has just had with Mustapha Kemal Pasha, the Turkish Nationalist leader.

The policy the British authorities have pursued in the face of the continued occupation by the Kemalists of the region in the vicinity of Chanak, is believed in London, to have been due partly to the absence of definite information as to how far Great Britain could depend upon French and Italian support in the event of hostilities with the Kemalists.

An agreement with the Ankara government, concluded some time ago by M. Franklin Bouillon, included a clause under which France undertook not to engage in military operations against the Turks in Asia Minor.

Reports from Constantinople are to the effect that Mustapha Kemal is in favor of peace; but The Associated Press correspondent asserts that the French and Italian generals in the Turkish capital express the belief that the British ought to withdraw from Chanak and confine themselves to the European side of the Gallipoli peninsula.

It is expected that the meeting between Franklin Bouillon and Mustapha Kemal will make the actual situation clearer. The situation as revealed here today following an important cabinet meeting, appeared to be that the British government had arrived nearly at the end of its patience. What is said to have been virtually an ultimatum demanding that the Turkish troops quit the Chanak zone has been sent to Mustapha Kemal Pasha, and after the cabinet meeting, it was said that Brigadier General Harrington had been informed that he would have the full support of the government in taking whatever steps he considered advisable to bring the Turkish occupation of the forbidden zone to an end and thus terminate the grave situation, which was considered nothing less than defiance to the British empire and in direct contravention of the terms of the allied note.

The British government's view regarding this note, is that if one part of it is broken, all of it becomes ineffective.

Will Require Withdrawal. It was added that the British government no longer will be satisfied with Kemal's promise that his troops will advance no further, but will require the actual withdrawal of the nationalist forces.

According to the official view here at the coming meeting between Gen. Harrington and Kemal, nothing will be discussed but actual military matters. It is intended to clear up any misunderstanding arising from the Kemal charges of aggression. It will be contended that the British operations are necessary and justifiable, but not hostile.

There have been reports today that the Turks might be allowed to cross into Thrace in return for the evacuation by Kemalists of the whole of the neutral zone. These reports met with little credence in London, but according to The Associated Press correspondent, in Constantinople, there is talk that of the Greeks being asked to evacuate eastern Thrace by October 10, permitting the Turks to enter the region by way of ports on the Sea of Marmora. The view in official circles here tonight, was that as the Sea of Marmora has been declared neutral, the Greek fleet can operate there and effectively prevent the Turks from crossing.

DEMONSTRATION OF MODERN TELEPHONE GIVEN TO PIONEERS

Audience of 13,000 Persons Witness Demonstration at Cleveland

(By The Associated Press)

CLEVELAND, O., Sept. 29.—Members of the Telephone Pioneers of America and an audience of 13,000 persons witnessed a demonstration of the wonders of modern telephony at tonight's session of the ninth annual convention of the pioneers. More than 2,000 persons from all parts of the country, who have had more than 21 years continuous experience in telephone work, are attending.

Gen. John J. Carty of New York, president of the Pioneers, presided and carried on telephonic conversations with Havana, Cuba, on one end of a telephone "set up" and San Francisco, on the other, with a score of intermediate cities throughout the United States answering a roll call.

On a huge map of the United States, set up on the stage, tiny electric lights flashed as the different cities thruout the country answered Gen. Carty's calling of their names.

Starting with Cleveland, who answered "here," Gen. Carty received responses to the roll call from Beaver Dam, Ohio; Chicago; Davenport, Iowa; Omaha and North Platte, Nebr.; Denver, Salt Lake City, Sacramento, and San Francisco, in the order named.

At San Francisco, Mr. Bates, of that office, carried on a conversation with Gen. Carty which was distinctly heard thru an amplifier by thousands in the local hall and all of the cities answering the roll call.

Then Gen. Carty extended the roll call to Pittsburgh, Harrisburg, New York City, Philadelphia, Jacksonville, Palm Beach and Key West, Fla., and Havana, Cuba, all promptly answering "here."

Havana said they distinctly heard the applause of the Cleveland audience, and Mr. Bates said he heard Havana clearly. Mr. Caldwell at Havana, Gen. Carty, and Mr. Bates, then carried on an extensive conversation, the two distant terminals being plainly heard by the local audience.

Speaking from San Francisco, Mr. Bates gave Mr. Caldwell in Havana, the recipe for making a mint julep.

Mr. Bates' daughter, in San Francisco then played a violin solo and Havana followed with a chimes phonograph record, both cities saying they heard the others musical selection perfectly.

(By The Associated Press)

DANVILLE, Ill., Sept. 29.—G. W. Warren, farmer living near Ogden, this county, was shot and instantly killed late tonight by Traffic Officer Prettman, making the third fatal shooting here in a week.

Neighbors who saw a man prowling about a suburban grocery notified the police and Motor Cyclist Policeman Prettman responded. He arrived as Warren was driving away in an automobile after a neighbor had punctured a tire with a bullet in an attempt to stop him. The officer gave a chase. In turning a corner, Warren lost control of his car, which rammed on a concrete post at a filling station, and he was overtaken by the officer, who jumped on the running board as Warren got his motor started again. When Warren attempted to shove him off, the officer fired, the bullet passing thru Warren's heart.

BRITISH MARSHAL POWERFUL FLEET IN DARDENELLES

Destructive Power is Greater Than Fleet at Scapa Flow

(By The Associated Press)

CONSTANTINOPLE, Sept. 29.—A formidable fighting force in floating fortresses and powerful bombing and combat aircraft, together possessed of greater destructive power than the British grand fleet at Scapa Flow, now guard the great international waterway of the Near East from the narrow to the Black sea.

Britain's gigantic armada in these waters, is led by the two 34,000 ton super dreadnoughts Revenge and Resolution. Then comes the three veritable giants of naval prowess, the battleships Centurion, King George, and Iron Duke. Some of the super warcraft possess ponderous 16-inch guns having a range of 26 miles. The remainder of the British naval fighting force here, consists of a number of the most modern cruisers, destroyers and the air carriers Pegasus and Argus.

The British are confident this formidable line of fighting ships will easily prove a stone wall barrier to the Kemalists should the latter attempt to cross the straits. It is also thought they will be a sufficient protection for the troops entrenched at Chanak and other points.

Constantinople, too, will live air battles in the event of war. The British airplanes will fly over Stamboul and other Turkish centers for the quick observation of the Turk uprising. These would be wireless to the naval and military police. These observing planes will be reinforced by a fleet of bombers, combat planes and seaplanes.

Opposing them, the Kemalists will have aircraft of various types to the number of sixty. The British are confident that in the end, the Kemalists are no match for them. They point to the fact that the Turkish Nationalist army does not possess anything approaching the 20 super planes which arrived today.

conville, just try to find a convenient place to park your car in the business district this afternoon or in the later evening hours.

Certainly the authorities will tackle a difficult case at Herrin in November, when 48 of the men recently indicted will go on trial at that time. An addition will need to be built to the court house to take care of the defendants, their attorneys and friends—to say nothing of the state's forces.

Writing about a man born in India who has made a definite place for himself in the world brings to mind the world while philosophy of Andrew Gump, who was recently made to say by his cartoonist creator: "It doesn't make much difference where you start. It's where you land that counts."

Jacksonville people in the last day or two have seen a fine example of what educational influences mean. Mr. Lahibaksh was born in India, where ignorance and poverty are very strongly in the ascendancy. But he came to this country and largely through his own efforts secured a splendid education. In public addresses he now gives the finest evidence of that educational training, and the starting with some handicaps has become a man of attainment, a man of broad culture who does not believe that education should be merely cultural.

In other words, he is putting his education to a good usage and is working for the benefit of others.

Henry Ford is quoted in the Wall Street Journal as stating his purpose to use his fortune in building up businesses that will give employment to additional thousands of men. After all, that is really the broadest and best kind of philosophy—giving men and women a chance to earn a living. It means more than gifts of other kinds. Men who manage industries or other enterprises in which people are employed really perform a worth while service to those communities even though the original motive may have been for individual profit. More worth while still will be any effort on the part of Mr. Ford or any other capitalist to build up business enterprises for the very purpose of furnishing employment under satisfactory working conditions.

Mr. Ford says he prefers this plan to the Rockefeller and Carnegie distributions, and certainly something can be said in support of his idea.

Why Not?

BY BERTON BRALEY

I GAVE the beggar fifty cents
From out my hard-earned competence,
And I felt very virtuous about it;
For there's joy to charity
Which warms the heart, as you'll agree
It does you good, there's not a chance to doubt it.

THAT night I drove my flivver car.
I hadn't run it very far
When all at once a splendid boat went by me;
The man within the driver's seat
Was decked in costly garb and neat,
And with averted glance I saw him eye me.

THEN all at once it came to me
Just who that wealthy bird might be—
It was the mendicant whom I had aided.
Of course it made me pretty sore
To think I'd given from my store
To one whose riches had me wholly faded.

I BROODED on it for awhile
And then—I smiled a subtle smile,
Because an inspiration struck me gaily;
So now four hours a day I sit,
With hat outstretched to catch each jit—
I'm cleaning up some fifty dollars daily!

HIGH RENTS

(NEA)

Rapidly mounting rents are driving writers and artists out of their colony, Greenwich Village, in New York.

A small room, formerly a horse stable, is turned into a studio at \$200 a month rent. This is said to be a typical case. Such a sum, obviously, is beyond the means of the artist or writer struggling for recognition.

Why don't the artists and writers move to the country? you ask. They say they have to be near their market to get orders for their work.

A great fuss is being made over the situation by the Authors' League of America. The fuss will help advertise Greenwich Village and attract more tourists to its carefully-staged tea rooms, cabarets and other points of commercialized Bohemianism. This will bring more money to the village. Then rents will go up again.

Too bad, of course, that rents are high for the temperamental residents of Greenwich Village. They will not attract much sympathy, however, because nearly every one in New York and other big cities is also in the clutches of high rents.

The bigger and more congested our cities grow, the more it becomes obvious that the real problem of city life is rent.

It is rent that has compelled the use of elevators, tall buildings, small rooms, and the vanishing of the big yard that should be around every home.

Each year the rent problem in cities grows worse.

Many theories and suggestions have been advanced, to reduce rents generally. When all is said and done, high rent is the penalty of living in cities.

It follows, logically, that the way to escape from high rent is to get out of the city. Rapid transit is the route of escape. And the ideal form of rapid transit is airplane.

When airplanes become fool-proof, safe, speedy, compact and cheap, cities will become collections of factories, theaters and shops. People will live far out in the country and travel back and forth by planes.

The greatest value of the airplane eventually will be in bringing cheaper rent. Obviously, it is to the selfish interest of every American to do everything in his power to assist the development of flying craft.

The flying machine will free the city man from high rent, just as the railroad and auto have freed the farmer from isolation.

C. OF C. TO VISIT SHOE FACTORIES

Will Investigate Factories at Charleston and Litchfield—May Bring Factory to This City.

The Industrial Committee of the Chamber of Commerce were busy yesterday selecting business and professional men to visit the cities of Charleston and Litchfield for the purpose of investigating the shoe factories there. A large shoe concern of St. Louis, Mo., is desirous of locating a large factory in Illinois and Jacksonville business men are doing all in their power to have it located here. Several times in the past it has been thought that a like factory might be located in Jacksonville but in every case the attempt to have the factory located here has been unsuccessful. It is hoped that this time the committee efforts will meet with success.

In the event of a factory of this kind being located in Jacksonville employment would be given to approximately 500 people. Two hundred and fifty men and two hundred and fifty women would be employed and the ages of the employees would range from 16 to 75 years. It is easily understood that the location of such a factory in Jacksonville would mean a great deal in the industry growth and progress of the city.

Woman's College Notes

Members of the greetings staff gave a stunt at the chapel hour yesterday morning to get up enthusiasm and secure subscriptions for the school publication. The girls had planned a clever scene on "The 5:15." The train was equipped with motorman, conductor and plenty of passengers. The topic of conversation among the passengers was the Greetings and a discussion of the fine points of the magazine and why every girl in college should be a subscriber. This was followed by a dance by Miss Audrey King, who dressed in a costume carrying out the college colors. A subscription campaign is being put on at the school and is in charge of Miss Margaret Fowler, editor of the Greetings, and Miss Elson Pires, business manager of the publication.

At an election held yesterday, Miss Ethel Morris was elected president of the sophomore class at Illinois Woman's college. Other officers elected by the class were Miss Gertrude Foster as student representative, Miss Beatrice Hasenstab as athletic representative, and Miss Zola De Haven as class treasurer.

The annual party which the sophomores give in honor of the freshmen class will be held this evening in the college gymnasium. This party is usually given the week end and the junior and senior classes are at Lake Matanzas. The party this evening will be in the form of an informal stunt and dancing party. Miss Ethel Morris, president of the sophomore class is in charge of the arrangements for the affair and she is assisted by several committees composed of members of the class.

Bids were issued last evening by the four societies of the college inviting new girls to memberships in the various organizations. According to the new plan of society managements which was inaugurated last year, only girls who have spent a year at the college as freshmen and have returned this fall as sophomores, are eligible to membership in the societies at this time. After the invitations had been issued the new girls were taken to the society halls and informal receptions held in their honor. Phi Nu, Belles Lettres, Theta Sigma and Lambda Mu, were the societies which issued invitations last evening. Invitations were issued to about sixty-five girls.

"PEP" MEETING AT HIGH SCHOOL

Much enthusiasm and real high school pep was shown at the "pep meeting" held at the high school yesterday afternoon. The meeting was held to increase interest in the foot ball game which will be staged this afternoon on the Illinois college field between the Pleasant Hill high school and the Jacksonville high school. Coach Mitchell and members of the team were called to the platform and made speeches and Harold Kamm, the cheer leader, led the students in some rousing yells. Lawrence Laney of last year's senior class was present and led some of the yells. To add to the general enthusiasm a group of high school musicians furnished peppy music for the occasion.

98 Out of Every 100 Women Benefited

An Absolutely Reliable Statement Important to Every Woman

Remarkable Results Shown by a Nation Wide Canvass of Women Purchasers of Lydia E. Pinkham's Vegetable Compound. 50,000 Women Answer

For some time a circular has been enclosed with each bottle of our medicine bearing this question: "Have you received benefit from taking Lydia E. Pinkham's Vegetable Compound?"

Replies, to date, have been received from over 50,000 women answering that question.

98 per cent of which say YES. That means that 98 out of every 100 women who take the medicine for the ailments for which it is recommended are benefited by it.

This is a most remarkable record of efficiency. We doubt if any other medicine in the world equals it.

Think of it—only two women out of 100 received no benefit—98 successes out of a possible 100.

Did you ever hear of anything like it? We must admit that we, ourselves, are astonished.

Such evidences should induce every woman suffering from any ailment peculiar to her sex to try Lydia E. Pinkham's Vegetable Compound and see if she can't become one of the 98 THE LYDIA E. PINKHAM MEDICINE CO., Lynn, Mass.

Of course we know that our medicine does benefit the large majority of women who take it. But that only two out of 100 received no benefit is most astonishing.

It only goes to prove, however, that a medicine specialized for certain definite ailments—not a cure-all—one that is made by the most scientific process; not from drugs, but from a combination of nature's roots and herbs, can and does do more good than hastily prepared prescriptions.

You see, we have been making, improving and refining this medicine for over 50 years until it is so perfect and so well adapted to women's needs that it actually has the virtue to benefit 98 out of every 100 women who take it.

It's reliability and recognized efficiency has gained for it a sale in almost every country in the world—leading all others.

Eat Again Like
A Hungry Child

The work of the stomach is to extract the life-giving properties from the food you eat, and these properties are distributed through the body by the blood. If the stomach does not perform this work, as Nature intended, the blood suffers and the entire system becomes affected.

The eight different ingredients in TANLAC, the wonderful stomach medicine and system purifier, are so blended that they readily assist the stomach in performing its natural function. Its corrective action will make you eat again like a hungry child.

TANLAC is highly recommended by all leading druggists.

SUBMARINE CABLES ARE NOT IN DANGER

Companies Are Showing Great Activity Since Armistice—Now 325,000 Miles Thruout World.

LONDON—Submarine cabling is not in danger of being superseded by wireless transmission, if one may judge from the activities of cable companies since the armistice. One European company has laid over 25,000 miles of ocean cable in the past three years, and it is believed that American companies have done as much in other parts of the sea.

Today the world is encircled by 325,000 miles of electrified ropes that carry messages from man to man. Fifty years ago there were only 8,000 nautical miles of cable. On the modern routes duplicate, triplicate, and even sextuplicate cables are provided, and the entire system is linked up by alternative and circuitous lines, so that if interruption occurs on one artery another may be quickly set into use. Land lines that link these ocean cables into one vast network constitutes the nervous system of the civilized world. There is hardly any spot on the habitable globe which cannot be reached by a message over this great arterial system.

With the amazing development and perfection of wireless as a means of disseminating the world thought, it was believed at one time that the submarine cable system would become obsolete; but the fact is that the business of the ocean telegraph companies has increased by leaps and bounds until today there are scarcely sufficient cables to carry the enormous volume of messages daily sent across the Rive Oceans and under the Seven Seas. It is apparent there is ample room for both forms of telegraphy.

The development of the submarine cable reads almost like a romance. As in so many of the world's other modern miracles, and inventions it was an American—Cyrus W. Field—who was the pioneer in the industry. In 1858 he laid the first cable between Newfoundland and Ireland. This line was 2,500 miles long and the wire weighed one ton to the mile. The project was characterized at the time as the boldest feat of electrical engineering ever attempted. The cable tells then were \$100 for 20 words of five letters each, and \$5 for every five letters extra. Today the rate for 20 words is less than \$5.

THE MAN FROM INDIA HEARD BY ROTARIANS

Victor Iahabaksh Gave Most Inter-
esting Picture of Conditions
in Native Land—A Brilliant
Speaker.

There was an unusually large attendance at the Friday luncheon of the Rotary club at the Pacific hotel. The address was given by Victor M. Iahabaksh of India who had for his theme, "Political Conditions in India." It was one of the most interesting and interesting addresses that the Rotarians have heard, the speaker presenting facts about his native land in a way which gave evidence of his broad culture and training, and his experience as a public speaker.

There were frequent sallies of wit and humor and the audience was regretful when the final word of this story of India had been told.

The guest list of the day included J. W. Adams, Chicago; Percy Talbot, Berlin, Wis.; Dr. W. A. Wesner, Murrayville; O. C. Wieden, Benton, Ill.; Carl E. Newport, Dr. C. C. Chapin and Dr. P. C. Rempe, of this city.

Mr. Iahabaksh is not new to Illinois, as he graduated from Illinois Wesleyan University at Bloomington and subsequently took the theological course in Chicago. His education was supplemented by study at Oxford University and in extensive travel.

During the months of his stay in the U. S., he has not been idle, but has taken all opportunity to familiarize the people of this country with the great need that exists in India. In that land, the speaker said, there are 320,000,000 people, nearly three times the number there are in the U. S., and 147 languages are spoken.

The Great Need.

"The greatest need of all for India is education and the poverty prevailing is of course a great deterrent to educational work. The average earnings of a very large percentage of the people is \$12.50 per year, and of the whole people 90 per cent can be classed as illiterate. In the farming communities the percentage is still higher and 99 per cent of those engaged in agricultural work are illiterate.

One unfortunate condition, the speaker said, in educational work is the fact that the natives who are educated must have their viewpoint changed, for they have the idea, inherited from England, that when one is educated that he must cease from all manual labor. Their first thought is that education is only for cultural purposes.

Mr. Iahabaksh suggested that the people of America often dissatisfied with conditions, do not realize how fortunate they are. On the other hand, he rapped the self-sufficiency of the average American and said that most Americans seem unwilling to admit that anything anywhere else can possibly be the equal of that found in their own U. S.

Then he said, this same smugness of complacency belongs to the English as well and to that fact

he attributed the dislike that was shown between the Americans and Englishmen among the troops in war time.

Mr. Iahabaksh mentioned these facts in support of his statement that after all, people are very much alike wherever you find them, notwithstanding the varying surroundings as to education and opportunities.

Mr. Iahabaksh in his work in India seeks to improve the agricultural conditions and does this by demonstrations, much in the way that is done in the U. S. Through experimental means it is possible after some years to get the natives to use some modern implements and methods in the planting of their crops. In this way the yield of grain per acre is readily raised from 7 and 8 bushels to 25 and 30.

Not much improvement in an educational way can be done until the earnings of the people are increased and they live better. Until the people are better educated, Mr. Iahabaksh said, India is not ready to become a republic, for he voiced the hope that there may come an end of British rule and the introduction of democracy as soon as the people through education have become fitted to govern themselves.

The speaker paid a tribute to Gandhi, the India leader whom he described as a most sincere man, who is seeking to practice literally the injunctions of Christ and who strives to follow the Golden Rule. He believes with Gandhi that all people should govern themselves, although he differs from Gandhi in thinking that that time has arrived for India.

Peoria, Ill.—"I have taken two of Dr. Pierce's remedies, the Favorite Prescription and the Golden Medical Discovery, during expectancy and afterward and my health was greatly improved. My health at such times was extremely delicate and I had incessant coughing spells, which were relieved by taking 'Golden Medical Discovery.' I always keep a supply of Dr. Pierce's Pleasant Pellets on hand for my children to take as a stomach and liver regulator when they are threatened with sluggish liver and constipation. TOLD ABOUT SCHOOLS IN INDIA

During the chapel exercises at Illinois College Friday morning, Victor M. Iahabaksh of Calcutta, India, gave a short talk to the students on existing conditions among the schools of India. He compared our school system to theirs and then pointed out where we had the advantage over the India students. Mr. Iahabaksh laid considerable stress upon the fact that India young men were more willing to attend school than the average American youth, who is sometimes compelled or bribed to go to school. The methods of studying are about the only remaining primitive methods left in the India schools. The lack of financial means hinders the education of a majority of India children. The great number of students to be taken care of is also a serious problem that can hardly be dealt with properly. The entire student body enjoyed the talk very much.

CHAPIN.

The pastoral helpers of the Christian church, held an all day meeting at the church Thursday. At noon a splendid chicken dinner was served to the sixteen members present. Before adjourning a chain letter was written to Mrs. Sarah Heiser, one of the members, who is at present in St. Joseph, Mo.

Miss Herment Fahlbusch entertained her Sunday school class at a weiner roast in the Onken pasture, Thursday afternoon. After enjoying a delicious lunch they played games until the dusk warned them of the lateness of the hour.

OTSYS'S BROTHER AT ILLINOIS U.

Other of Famous Half Back is Likely Candidate for Football Team.

URBANA, Ill.—Rune Clark of Arhage, Ill., brother of the famous "Posty" Clark of Illinois, is getting the nod from the University of Illinois to play football this season. Coach Bob Zuppke is pleased with his showing, and because he is the first real "triple threat" at half back, he has had some time, has pitched him from half back to quarterback, and because he is the first real "triple threat" at half back, he has had some time, has pitched him from half back to quarterback, and because he is the first real "triple threat" at half back, he has had some time, has pitched him from half back to quarterback.

Scrimmages have developed a weakness in the line that was not expected. The backs were given few plays and they proceeded to mash their way thru with comparative ease. First against the regular line, and then against the second string team, the combination of Clark, Dawson, Happenny and Woodward ripped big openings. Players in the line, A. C. Baur, J. W. McMillen, Coolidge, Oakes, J. J. Miller, Roberts and Lesch, are getting their share of the training now, but it is expected that the line will be strong after the first few trials in games. The line is green and have little or no conference experience. The Orange and Blue wingmen this year are the best since "Chuck" Carney's All-American days, Captain Dave Wilson, Rokusek and Richards being the leaders for the two jobs.

MANHATTEN, Kans.—Captain R. D. Hahn of Clay Center, Kans., captain of the 1922 Kansas Aggie football eleven, is playing his third and last year on the team. He will receive his sheepskin from the division of agriculture next spring. Hahn weighs 190 pounds and plays in the left guard position. M. F. (Mike) Ahearn, director of athletics, says of Hahn: "He is fast on his feet and has an excellent football head."

BOSTON AGAIN TRIMS LEAGUE LEADERS

BOSTON, Sept. 29.—Boston again defeated the league leading New York Yankees. Jack Quinn, former Yankee spitball star, held the visitors to five hits and had the better of Bob Shawkey in a sensational play 1 to 0 game. Bob Meusel twice struck out with men on second or third and two out. Ruth's fielding was sensational. Score: New York—000 000 000—0 5 0 Boston—000 001 00x—1 6 1 Shawkey and Schang; Quinn and Ruel.

CHICAGO TEAMS ENTER POLO TOURNEY

Chicago, Sept. 29.—Three Chicago teams have been entered in the Mississippi championship polo tournament, to be held at Grenada, Miss., October 23-27. It was announced today. Eugene Byfield, captain of the Grasmere Farm team, which won the mid-western championship, will lead his team against the Glenwild, Miss., four headed by Commander John Borden. The other two Chicago teams are the Onwentsia and Indian fours from Lake Forest.

John Wild of Murrayville paid the city a visit yesterday.

TOBIN'S TWO HOME RUNS DEFEAT SOX

Van Gilder Also Pitches Good in Pinches—Browns Still Have Fighting Chance For Pennant.

ST. LOUIS, Mo., Sept. 29.—Two home runs by Johnny Tobin and masterful pitching in the pinches by Vangilder, gave St. Louis a 3 to 2 victory over Chicago. Tobin

JOHNNY TOBIN

clouted the first ball Faber pitched, and it went into the right field stands for a circuit drive. His second homer came in the third inning on his second trip to the plate, and the ball fell virtually in the same place the first one did. The victory continues the mathematical possibility of St. Louis taking the pennant, in view of New York's defeat today. Should the Browns win their two remaining games and the Yankees lose theirs, the teams would be tied for first place. Score:

Minneapolis, Sept. 29.—A report that Dan Cole, a veteran end of last year's University of Minnesota football team, would join the Gopher squad within a few days, added optimism about the campus today. Although not a brilliant player, Cole is a willing fighter. Today, the four coaches, each centralizing on a different part of the game, gave the squad a light workout.

Notes from the Big Ten Camps

Illinois. Champaign, Ill., Sept. 29.—With six illini regulars on the sidelines during the long scrimmage on Illinois field this afternoon, Coach Zuppke, in seeking a new set of backs, made a big find in Emil Schulze, of Kankakee. Schulze is the fastest man on the squad and a good all-around football player. Robinson, Happenny and Hall are leaders suffering injuries.

Wisconsin. Madison, Wis., Sept. 29.—The Badger varsity squad went thru its paces with the second team tonight in a scrimmage that showed strengthening of the line. Coaches are concentrating on the forward pass game with Quarterback Barr as the center of play. Gibson at halfback is showing up strikingly in practice.

Chicago. Chicago, Sept. 29.—The University of Chicago varsity squad had an stiff workout on Stagg field today. Aspirants to show kicking and punting jobs, showed their stuff while the backfield was engaged in making the catches and open field running. In the latter practice Heinie Schulze showed considerable skill, and also came to the fore as a tackler.

Indiana. Bloomington, Mich., Sept. 29.—Indiana University football team was put thru a lively scrimmage on the mud covered athletic field today by Coach Herron. The regulars made three touchdowns on the scrubs and the latter when given the ball, were unable to make headway. The work of Gene Thomas, regular halfback, featured the practice.

Michigan. Ann Arbor, Mich., Sept. 29.—The first secret practice of the Michigan griders is set for Monday, it was announced today. Coach Yost then will outline some new plays to be tried in the contest with Case next Saturday.

Examination of Captain Goebl's injured knee, disclosed today that the hurt was not serious and he will be back in togs in about a week.

Purdue. LaFayette, Ind., Sept. 29.—An intensive forward pass scrimmage featured the work of the Purdue University football squad in practice today, Coach Phelan, drilling

his men on the different formations for more than an hour. The overhead attack is far from developed at present, according to Coach Phelan, and the team needs much work along this line.

Northwestern. Chicago, Sept. 29.—The Northwestern signal drill lasting three hours. He also devoted some time to his punters and drop kickers and later ran his squad thru a long secret scrimmage. Penfield, one of the backfield mainstays, spent about an hour booting the pigskin over the bar from the 20, 30 and 40 yard lines. McElwain, who is expected to do most of the punting this season, also loosened up his kicking legs.

Northwestern. Chicago, Sept. 29.—The Northwestern signal drill lasting three hours. He also devoted some time to his punters and drop kickers and later ran his squad thru a long secret scrimmage. Penfield, one of the backfield mainstays, spent about an hour booting the pigskin over the bar from the 20, 30 and 40 yard lines. McElwain, who is expected to do most of the punting this season, also loosened up his kicking legs.

LaFayette, Ind., Sept. 29.—An intensive forward pass scrimmage featured the work of the Purdue University football squad in practice today, Coach Phelan, drilling

his men on the different formations for more than an hour. The overhead attack is far from developed at present, according to Coach Phelan, and the team needs much work along this line.

AMERICA HAS LONE HOPE IN GOLF TOURNEY

WHITE SULPHUR SPRINGS, W. Va., Sept. 29.—America will have a new woman golf champion tomorrow, new for the coming year and one on whose brow the national crown never before has rested. The semi-finals in the national tournament here today left Miss Glenna Collette of Providence as the American hope to keep the title at home and pitted against her Mrs. William A. Gavlin, of England.

Today's play eliminated Mrs. H. Arnold Jackson, Greenwich, who was striving to regain the titular crown which she held in 1908, and again in 1914, and removed from the realm of possible champions, Miss Ruth Cummins of Chicago.

Miss Collett defeated Miss Cummins, two up, and Mrs. Gavlin defeated Mrs. Jackson, 4 and 2. The cards follow.

PRICE OF WHEAT TAKES A DROP

By Associated Press.
CHICAGO, Sept. 29.—Influ-
enced largely by changing aspects
of relations between the British
and Turkish forces at the Dar-
danelles, the wheat market to-
day declined after an early ad-
vance. The close was unsettled,
4 to 2 1/2c net lower, with Decem-
ber \$1.04 to \$1.04 1/2, and May
\$1.07 1/2 to \$1.07 3/4. Corn last
8 1/2 to 1 1/2c, oats finished un-
changed to 2 1/2c off, and provi-
sions unchanged to a setback of
15c.
An advance in Liverpool quotat-
ions today despite an easy close
here yesterday, had much to do
with the upward tendency which
for the first two hours morning,
characterized the wheat market
in Chicago. Many traders con-
struing the Liverpool advance as
reflecting news that British forces
had been hemmed in at Chanak,
were slow to allow for latter ad-
vices indicating likelihood that
hostilities would be averted thru
a conference between British and
Turkish commanders. The mor-
pensive view of the outlook ap-
peared to dominate the market
during the last part of the day,
and trading ended before word
was received of a British ultima-
tum to the Turks.
Owing to lack of any aggres-
sive support, it took only a mod-
erate amount of selling to bring
about the late decline in the
wheat market. Liquidation on
the part of holders of Septem-
ber delivery was a feature. A
difference of 5c between Sep-
tember and October, made end-of-
the-month ownership of Septem-
ber seem undesirable, especially
as primary receipts today were
announced as well in excess of
figures last week and a year ago.
Corn and oats paralleled the
action of wheat. Crippled trans-
portation facilities had some
benign effect on corn, but not
on oats. Provisions were governed by
fluctuations in hog values.

MRS. LEE TENDICK TAKES OWN LIFE

Woman Takes Paris Green then
Jumps in Well—Death Came
Several Hours Afterward.

"Lee is not to blame. He has been good as gold to me I am doing this myself," Dorothy Tendick, said.

"To the Public."

These few words spoiled the life tragedy of Mrs. Lee Tendick, 1025 Tendick street. After writing them she took Paris Green and jumped into the well on the premises. She died several hours afterward from the effects of the poison and exposure.

Coroner Rose was notified and empanelled a jury which held an inquest at the Gillham Funeral Home, where the body had been removed, Friday evening. The jury was composed of Charles C. Pires, foreman, Walter N. Smith, E. T. Cosgriff, Allen Kelly, Fred A. Cain and Claude H. Cully, clerk. After hearing the testimony the jury returned a verdict that death resulted from taking Paris Green and jumping into a well with suicidal intent.

James Meehan who resides at 904 West Morton avenue and is a brickyard laborer testified that he stopped at the Tendick residence about 11:30 Friday morning and noticed boards off of the platform over the well. He looked in the well and saw Mrs. Lee Tendick.

Witness said Mrs. Tendick asked him to get her out, saying she fell in. Meehan said he called Frank Tendick, father-in-law of the woman who was near. They secured a ladder and got Mrs. Tendick out and Mr. Tendick took her in the house while witness said he went for Mrs. Frank Tendick.

Frank Tendick, father-in-law of Mrs. Lee Tendick told of Mr. Meehan calling him about 11:00 o'clock. When he arrived he saw his daughter in law in the well. Mr. Tendick said he asked her if she fell in the well. She said "No I jumped in but don't tell Mr. Meehan." Witness said he asked her why she did it and that she told him, "I lied to Lee." Mr. Tendick also told of finding the note which was in her own handwriting.

Wanted to Die

Witness also said he asked if she wanted a doctor and she said no that she wanted to die. He said his son and wife were at his home the night before and she had been acting down hearted.

Dr. C. E. Cole told of being called to the Tendick home about 11:30 o'clock. He found Mrs. Tendick wrapped in blankets and said she was very cold. He asked her if she had taken anything and she said "Yes, she had taken Paris Green."

Dr. Cole said he gave a stimulant and something to empty her stomach. He said Mrs. Tendick told him she had vomited twice. Witness said he left the house about noon and was called again about 6 o'clock. He found that she had collapsed and was beyond medical aid. Dr. Cole stated that death probably resulted from the poison and being exposed in the water so long.

Lee Tendick, husband of the woman, testified that he left the house about 6:30 Friday morning to help Mr. Cruzan bale hay. He said he was told of his wife's act when he returned home at noon. His wife had told him to return to work in the afternoon and he had done so. He said he never knew who had found her or how they had gotten her out of the well. Witness said his wife's name before her marriage was Dorothy Peet.
